6. What you will need to pay each month

This is based on borrowing £375,541. This offer assumes that the mortgage will start on 31 October 2006.

Part 1	Monthly Payment
You will make 120 payments at a fixed rate of 5.49% <i>(interest only)</i>	£1,548.65
Part 2	
You will make 22 payments at a fixed rate of 4.45%	£791.72
Total	£2,340.37

These payment figures shown above assume that rates will not change

Cost of Repaying the Capital

You will still owe £340,000 at the end of the mortgage term. You will need to make separate arrangements to repay this. When comparing the payments on this mortgage with a repayment mortgage, remember to add any money that you may need to pay into a separate savings plan to build up a lump sum to repay the amount you are borrowing.

The repayment vehicle that you intend to use to repay the capital is to be confirmed prior to completion.

You are reminded of the importance of having a suitable repayment vehicle in place at all times. You should regularly check the performance of any investment used as a repayment vehicle to see whether it is likely to be adequate to repay the capital at the end of the mortgage term.

When you have found out what payments you need to make into a savings plan you may find it helpful to add these to your mortgage payments and put the total payment into the column opposite.

6a. What you will need to pay in the future

The full details of your mortgage payments are shown below:

Part 1	Monthly Payment
Followed by 60 payments at The Co-operative Bank's Standard Variable Rate currently 6.64%	£1,871.56
Part 2	
Followed by 27 payments at The Co-operative Bank's Standard Variable Rate currently 6.64%	£810.36

These payment figures shown above assume that rates will not change. (*) Remember to add the cost of any savings plan to these monthly payments
